GOVERNOR SIGNS ROCKAWAY FORT SITE SEIZURE BILL

Measure Rushed Through Legislature with Only One Opposing Vote

COMMISSIONER NAMED; STARTS WORK TO-DAY

Damages To Be Settled Later Unless Terms Can Be Arranged

(From a Staff Correspondent of the Tribune.) Albany, Feb. 21.—Physical steps necessary to the seizure by the state of the Rockaway Neck and the surrounding area, in pursuance of the provisions of the Brown bill, were taken to-day. Governor Whitman named Adjutant General Stotesbury, State Engineer Williams and General W. W. Wetherston as a commission to acquire the Rockaway Neck and the surrounding area, in pursuance of the provisions of the Brown bill. He also sent a telegram to Secretary of War Newton D. Baker apprising the latter of the action of the legislature and the appointment of the commission. In the absence of Mr. Williams and General Stotesbury, General Wetherston directed a deputy state engineer to go to New York to-day and confer with Colonel Frederick W. Abbott, Corps of Engineers, U. S. A.

The Brown bill provides that the condemnation commission shall seize land for defense purposes, as soon as maps and surveys are certified, by filing a certificate of title with the secretary of State. Damages are to be settled later, if no terms can be arranged before seizure, in the same way that canal land claims are settled.

The Brown bill, supported by an emergency message from the Governor, was passed unanimously by the Senate three minutes after it was called. The Socialist Assemblyman Shipplack alone opposed it in the Assembly.

Fort Seizure Costs City \$1,000,000, Mayor Says

Mayor Mitchell declared yesterday that the passage by the Legislature of Governor Whitman's emergency measure for seizure of the land at Rockaway Point for government fortifications meant that the Tammany members of the Legislature, in an effort to make political capital out of a national necessity, had saddled the city of about \$1,000,000 on the City of New York. He denounced the opposition to the enabling bills introduced by Senator Mills as "utterly insincere," and pointed out that the state would be liable for large consequential damages, of which this city would have

Chamber of Commerce to Aid in All Purchases for Army

Guaranteed Return on Assets of Contractor Urged by Chairman

(From The Tribune Bureau.) Washington, Feb. 21.—Extensive profits are to be prevented in the event of hostilities. The Council of National Defense has called on the Chamber of Commerce of the United States for assistance and advice in purchases to be made by the army quartermasters. The chamber recently passed a resolution providing that the basis of supply of government requirements in war and peace from private sources should be at a rate of profit so low as to preclude a profit interest in war.

Secretary Baker, who is president of the Council of National Defense, has written to President Rhett requesting the National Chamber to appoint such local committees, through affiliated commercial organizations throughout the country, as may be necessary to co-operate with the district depot quartermasters in the purchasing of supplies now authorized by law.

"The Chamber of Commerce of the United States will gladly respond to Secretary Baker's call," said Bascom Little, chairman of the National Chamber committee on national defense and former president of the Cleveland Chamber of Commerce, "because it feels that the special knowledge of many of its members concerning business problems and policies could be of value to the government, particularly in relation to the very large purchases of supplies of all kinds for the military service."

"It is unwise to permit large profits to a few people through the making of contracts for the government," said Little, "and the stock market speculation which inevitably follows that process. The basis of profit should be a guaranteed return of a small percentage on the book value of the assets of the contractor. This is a reasonable and just basis of profit, and it would be the best way to stabilize the economy of the country."

"The bonds on industrial plants must be paid, and the holders of the shares of these companies must not suddenly be faced with a cessation of income. The result of a small guaranteed profit will be the instant stabilizing of industrial credit and the complete elimination of stock market speculation."
